SUMMARY

B.Tech AI & Data Science graduate who works across the full data lifecycle — wrangling, EDA, dashboarding, automation. Built end-to-end Excel/Power Query analyses on real-world job market data and an n8n-based AI automation pipeline. Comfortable turning messy structured and unstructured data into something a business can actually use.

EDUCATION

EASA College of Engineering & Technology — Coimbatore, Tamil Nadu
Bachelor of Technology (B.Tech), Artificial Intelligence & Data Science — *Sep 2022 – Mar 2026*

Government High School, Boovanathapuram — Sivakasi, Tamil Nadu
Higher Secondary Education (XII) — *May 2022*

PROJECTS

Amazon Delivery Performance & Prediction Dashboard | *Power BI, DAX, Star Schema* — GitHub →

- Designed a star-schema data model (Fact_Delivery, Dim_Date) in Power BI and built a DAX measures library to benchmark predicted vs. actual delivery times against a 120-minute SLA target
- Quantified operational friction from weather and traffic conditions, revealing high-traffic routes added 30+ minutes and SLA compliance dropped to 20–40% during adverse conditions, informing dynamic routing/SLA recommendations

Data Science Job Market Analysis | *Excel, Power Query, Power Pivot, DAX* — GitHub →

- Collected and analyzed real job-posting data from multiple sources using Power Query ETL and a Power Pivot data model; performed data quality checks to ensure data integrity
- Built custom DAX measures and PivotCharts to communicate findings, identifying SQL and Python as the highest-value skill combination by demand and salary

Signup-to-Purchase Funnel Drop-off Analysis | *Python, Pandas, Power BI* — GitHub →

- Built an automated funnel analysis pipeline (Python/Pandas) for a Data Analyst technical assessment, computing stage-wise conversion and drop-off rates across a 5-stage signup-to-purchase user flow
- Identified the largest conversion leak (36% drop-off at Details Filled) via automated flagging logic and delivered a data-backed UX recommendation to reduce form friction at that stage

EXPERIENCE

Data Analyst Intern — Mar 2026 – Jun 2026
Carpediem Tech Innovations — *Coimbatore*

- Built an attendance management system to capture, manage, and monitor student attendance data efficiently.
- Developed an admin dashboard displaying key KPIs including total students, mentors, courses, attendance percentage, placement rate, and certificates.
- Implemented data-driven analytics and reporting to track institutional performance, identify trends, and support administrative decision-making.

Gen AI Intern — Dec 2025 – Jan 2026
Carpediem Tech Innovations — *Coimbatore*

- Built an AI-powered Gmail email summarizer using the OpenAI API to extract key information from incoming emails and generate concise summaries
- Automated email-to-Slack alerts using n8n, connecting Gmail, OpenAI, and Slack to deliver summarized email notifications in real time and reduce manual monitoring.

TECHNICAL SKILLS

Data Analysis Tools: Excel, SQL (PostgreSQL) – Power Query, Power Pivot, DAX, Array Formulas
Visualization & Reporting: Power BI, Plotly, Streamlit
Programming: Python (Pandas, NumPy), R
Data Quality & Preprocessing: Data Cleaning, EDA, Statistics, Data Validation, ETL
Modelling: Scikit-learn, TensorFlow, PyTorch
Databases & Tools: PostgreSQL, Supabase, Git, REST APIs, N8N (workflow automation)

CERTIFICATIONS

Data Analytics Internship – Carpediem Tech Innovations
Data Analytics Job Simulation – Deloitte Australia (Forage)
GenAI Powered Data Analytics Job Simulation – Tata (Forage)
SQL (Intermediate) – HackerRank
