02— ABOUT

The story behind the queries

INSIGHT

Turning messy raw data into strategic decisions

Problem solver · Business minded

Arun Pandian
Data Analyst Specialist

Arun Pandian
Data Analyst Specialist

Data Analyst · Coimbatore, India

I'm an entry-level data analyst and B.Tech AI & Data Science graduate who works across the full data lifecycle — wrangling, EDA, dashboarding and automation — turning messy structured and unstructured data into decisions.

I've built end-to-end Excel / Power Query analyses on real-world job-market data and an n8n-based automation pipeline running on a local LLM. Most at home where a clean data model meets a question worth answering.

SQL Python Excel Power BI Power Query n8n

whoami.sql

```sql
SELECT role, focus
FROM   arun_pandian
WHERE  curiosity = TRUE;
```

04 — EXPERIENCE

Where I've made an impact

Internship

Dec 2025 — Jan 2026

Gen AI Intern · Carpediem Tech Innovations

Built NLP data pipelines for automated text processing and n8n automation scripts across APIs and databases — reducing manual data-handling effort and improving workflow consistency.

Arun Pandian
Data Analyst Specialist

Data Anaytics Intern · Carpediem Tech Innovation

Built a real-time job market analysis pipeline, processing live job-posting data to surface skill demand, salary trends, and hiring patterns — turning raw data into business-ready insights for stakeholder decision-making.

CERTIFICATE

OF COMPLETION

THIS CERTIFICATE IS PROUDLY PRESENTED TO

ARUN PANDIAN

for successfully completing the **Data Analytics Internship** Program at **Carpediem Tech Innovations** from **20 March 2026** to **20 June 2026.**

During the internship, Arun Pandian contributed to the development of the **Admin Panel and Attendance Capturing System**, including PostgreSQL Database Schema Design, demonstrating technical proficiency, professionalism, and a strong commitment to learning.

We appreciate the dedication and valuable contribution made during the internship and wish continued success in all future endeavors.

FAQ

Frequently Asked Questions

What tools do you use for Data Analysis?

My core stack includes SQL (PostgreSQL, MySQL) for data extraction, Python (Pandas, NumPy, scikit-learn) for transformation and modeling, and Power BI or Excel for visualization and dashboarding.

What is your approach to solving business problems with data?

Do you have experience with data cleaning and ETL pipelines?

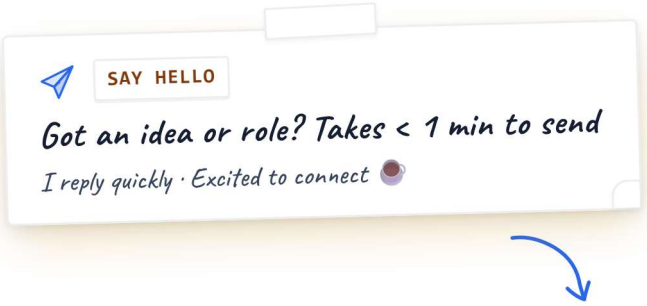

Are you open to full-time Data Analyst roles?
